Buildings You Can Trust

INTRODUCING THE PROTECTI-POD

Iso and Shipping Containers are almost the perfect containerized modular solution. They are shippable, transportable, versatile and due to their structural frame have incredible tensile load bearing properties, meaning they can be stacked up to ten containers high -Even when fully loaded!

Iso Containers are not physically resistant to determined attack or forced entry and aren't insulated. This makes them a frequent target for thieves or vandals and means that they have very poor thermal efficiency

Protecti-Pod makes use of our MSS High Security Composite Paneling System which is used to quickly and effectively line out and security harden shipping containers, making them the perfect High Security Containerized Solution, ready for fit out and use in a range of different applications

OR

We can save you time and expense by completing the fit out prior to delivery!!

PROTECTI-POD SOLUTION

PROTECTI-POD FIT OUT OPTIONS

Protecti-Pod offers a bespoke, fully fitted out, high security enclosure. It can be customized and built to specification, including the integration of:

- Mechanical and Electrical Fit Out
- HVAC Fit Out
- Benching
- Racking
- Security Door Sets
- Louvres
- Bar Sets
- Secure Service Penetrations & Fire Proofing
- Bespoke Flooring Options

A Huge Number Of Bespoke Applications In A Vast Array Of Sectors

- Micro-Data Centre's
- Mobile Tel-Coms Units
- CL3 Laboratories
- Blood Banks
- Armories
- Water Dosing Kiosks
- Water Sampling Points
- Hazardous Waste Storage
- LLWR Storage
- Mobile Panic Rooms
- High Value Item Storage
- Military F.O.B's
- 5G Facilitation
- Power Grid Infrastructure
- Cargo Storage
- Archives
- Military SCIF's
- Customs & Excise

M.S.S HIGH SECURITY COMPOSITE PANELING SYSTEM

MSS Composite Panels offer varying levels of physical resistance and can be selected according to your projects required time delay and specified tooling resistance criteria

- TD1 - Panel System – Time Delay 1
- TD2 - Panel System -Time Delay 2
- TD3 - Panel System -Time Delay 3
- TD4 - Panel System -Time Delay 4

MSS High Security Composite Panels are pre-finished and come in a wide range of standard colour's and textures, negating the need for costly and time consuming on-site hot and wet trades.

MSS High Security Composite Panels are wipe clean and dust resistant. They are suitable for use in Hygienic and Anti-Debris environments. Our Decorative and Hygienic flashing range conceals exposed fixing heads, nuts and bolts and are manufactured to identically match the panels face.

“High Security, Thermally Efficient, Fire Resistant and Hygienic”

MSS Composite panels have inbuilt unique layers of anti-cutting materials comprising of marine grade plywood and galvanized steel which offer various degrees of physical protection and intruder resistance

The MSS high security composite panel range is available with Mineral Wool and PIR insulation core types and offer excellent fire efficiency and a thermal U Value of up to 0.23 W/m2K

For further information regarding time delay please contact our technical sales office on:
sales@modularesecurity.co.uk

The MSS composite panel range offers fantastic acoustic reduction averaging $R_w = 43\text{dB}$. For applications requiring greater acoustic protection, we can offer a specialist acoustic paneling system.

Time Saving

Protecti-Pod offers a speedy lead time. Your protected environment will be rapidly in situ

High Security

Protecti-Pod provides a High Security, Attack Resistant Environment

Bespoke Fit Out

Protecti-Pod includes a full fit out option. Including M&E, HVAC, Racking & Benching

OUR SERVICES

At Modular Security Solutions we adopt a project cradle to grave service ensuring you're in safe hands every step of the way. Our In-House Design Package offers a stage and gate sign off process ensuring that high security and physical resistance is inbuilt into every bespoke project. Our CAD team meticulously design and detail every aspect of your high security Protecti-Pod.

Select your Iso-Container Size and let us know your requirements. We design and supply a wide range of containerized options including high security envelopes which can be delivered ready for your fit out OR bespoke, fully fitted out and fit for purpose solutions. As a client of MSS you will benefit from a Dedicated Project Manager who will act as a constant single point of contact and ensure your project runs smoothly and is delivered on time.
